

## SEARCHING FOR IT TALENT AT SECONDARY SCHOOL

Pál SARMASÁGI, HU

**Abstract:** The talent concept is complex similarly to concept of computational thinking and both can be difficult defined. The pupils who has open mind to computational thinking can become potential IT talent. How can we explore these pupils at secondary school? This paper investigates concepts and evaluation environment and presents some tasks and assessments that helps to identify the potential IT talents at secondary school. The classroom trial presents the novel combination of common known methodologies and devices.

**Keywords:** CS unplugged, IT talent, talent searching, computational thinking.
